

Annual I.T Security Incident Report

Reporting period: 1 Jan 2023 – 31 December 2023

Incidents reported: None

In4mo solera ensures that we have appropriate security control on our product and IT infrastructure against any cyber security threats or security incidents. By using intelligent automation and standardised policy rules, In4mo identifies privacy risks, and out-of-place items, and routes them to secure content services.

We pledge to preserve data confidentiality, system integrity, and availability of the system along with information used by an organisation's members.

A regular audit and report are conducted by the information technology security team at in4mo, including the following:

- Information security incident
- IT security incident
- Network security incident
- Security breach
- Data breach
- Cyber attack
- Ransomware attack

As a result, I am pleased to announce that during the reporting period, no I.T security incident affecting the customer's data has been reported.

Date: 5-2-2024

Jean-Christophe Andre
